

FOR IMMEDIATE RELEASE: Pompano Beach, FL, Las Vegas, NV and Indianapolis, IN

We are pleased to pass on today that **SKYX Platforms (NASD-SKYX)**, a highly disruptive platform technology company with 77 issued and pending patents globally and over 60 lighting and home décor websites, with a mission to make homes and buildings become safe and smart as the new standard, announced this morning ([CLICK HERE](#) for SKYX's own complete press release) that it has added to last year's awards tally from the annual Las Vegas Consumer Electronics Show.

At the just-concluded 2024 installment of C.E.S., as you'll read, SKYX's patented new game-changing smart home platform technology won two more awards: from U.S. leading technology publications *Residential Systems* and *Twice*.

Notably – and as we covered on the company's behalf prior to this year's C.E.S. – **SKYX has augmented its "Plug and Play" offerings with a more comprehensive product/set of technologies all now rolled into its "All-in-One Smart Platform."** The below is from this morning's SKYX release:

"The All-in-One Smart Platform is a complete stand-alone platform system that can operate on a standalone basis or can be used to connect light fixtures. The product is controlled by an app and voice control, including features such as scheduling, eco/energy saving mode, smoke and carbon monoxide detector, premium smart speaker, Wi-Fi repeater, Wi-Fi/Bluetooth and Matter connectivity, color-changing room ambiance/night light as well as an emergency light, emergency internet, house intercom features, plug & play lighting, and more. It integrates with Apple Siri, Amazon Alexa, Google Home, Samsung Smart Things, Cortana and more.

"Rani Kohen, Founder, Inventor, and Executive Chairman of SKYX Platforms Corp., said: 'We are very excited to have won these awards at CES 2024 for our game-changing all-in-one smart home platform technology. This exemplifies our commitment to home safety, quality, and excellence - all while pushing the boundaries of technology and redefining the future of the smart home and lighting industries.'"

SMPR's own Chris Temple visited a short time back with SKYX's V.P. of Design and Marketing Jonathan Globerson at the company's Pompano Beach headquarters and distribution site.

To learn more about SKYX's comprehensive and NEW All-in-One Smart Platform (which the company expects to begin making available to builders and consumers in Q1) check out THIS EXCITING NEW VIDEO from the company.
